REALTIME LAUNCHES NEW CROSS-PLATFORM WEBSITE IN SEPTEMBER

Realtime will release by September 2016 a brand new version of the www.realtime.ch website.

The new website features responsive design that allows the website to be viewed in best conditions on all type of browsers, but also on smartphones and tablets (iOS and Android).

The dynamic web-pages adapt to every device- and browser-type either in "Portrait"- or "Landscape"-mode. Interaction remains unchanged from one platform to another whereas the usability is adapted according to the specificities of the device. On iOS (iPad and iPhone), a shortcut icon can be set on the Desktop next to the existing Apps.
